## **DETAILED ACTION**

### ***Status of the Claims***

1. This action is in response to the restriction election filed on January 11, 2007. Claims 1-41 are pending. Claims 15-41 are withdrawn from consideration. Claims 1-14 are elected with traverse. Claims 1-14 are examined.

### ***Response to Arguments***

2. Applicant's arguments filed January 11, 2007 have been fully considered but they are not persuasive.

The applicant argues that the restriction is not proper because the examiner fails to show that the inventions are distinct and there would be a serious burden on the examiner if the restriction is not required. In the restriction election requirement mailed on December 14, 2006, examiner separated claims into six patentably distinct species, and the distinct feature in each species is specified. For example, species VI (claims 34-41) discloses the distinct feature of a predetermined diversity level relative to the initial efficient portfolio. Since each species has its distinct features, the different keywords searches have to be performed and the different rejection may be applied for each species; thus there is a serious burden for the examiner to exam all the claims at one time.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory

obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-41 of U.S. Patent No. 6,292,787 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both discloses determining an alternative portfolio that is more diverse than the initial portfolio by searching one or more dimensions of an error space,

and selecting the alternative portfolio if the cost is less than or equal to a predetermined diversity budget.
